

Simplenavi with 42d namespace examples

Documentation is [Simpelanvi](#)

Syntax and Usage

Use the following code to embed the navigation in your sidebar, start page.

```
{{simplenavi>}}
```

You can optionally give a namespace at which the navigation tree should start (e.g. useful for building different navigations for different language namespaces):

- [languages](#)
- [poky](#)
- [projects_in_the_air](#)
- **wiki**
 - **playground**
 - [qatest_apr_9_2022](#)
 - [qatest_aug_13](#)
 - [qatest_jan_7](#)
 - **simplinavi**
 - [sysadmin-test-001](#)
 - [support](#)
 - [dokuwiki](#)
 - [syntax](#)
 - [welcome](#)
- [wiki42d](#)

```
{{simplenavi>wiki42d}}
```

- [fedwiki](#)
- [sw](#)

```
{{simplenavi>wiki42d:poky}}
```
